 The Holding Discipline

The Deployable Rights Architecture™ & Licensed Assets Package™

Governance, Tiering, and Asset Authorisation Framework

Deployment Requires Strict Authorisation, Not Ownership

Licensing authorises the deployment of approved assets within defined standards and boundaries. Licensing does not transfer ownership of assets.

Valid Certification

Valid License

Deployment Rights

Both are essential conditions for exercising licensed deployment rights.

Governance-controlled assets remain under central authority and may only be deployed through approved assignment or deployment arrangements.

The Holding Discipline™ reserves the right to suspend, restrict, or withdraw deployment rights where certification, licensing, governance, or quality requirements are not maintained.

The Two Domains Governing Eligible Assets

Licensed Deployment

1. Foundation Assets™
2. Deep Application Assets™

Access Profile: Available in scaling, varied capacities across all license tiers (Categories 01 through 04).

Licensed Stewardship Assets™

1. Contribution Assets™
2. Holding Circle Assets™
3. Precision Intervention Assets™

Access Profile: Highly restricted. Reserved exclusively for Master-level authorisation.

License Category 04™ Unlocks the Master Stewardship Gateway

LC03: Licensed Holding System Professional™

The transition to **Licensed Master Holding Practitioner™ (LC04)** marks a structural paradigm shift in the Deployable Rights Architecture™ —moving from application to systemic stewardship.

Tipping Point

LC04: Licensed Master Holding Practitioner™

Maximum Deployment

Grants unrestricted access to all **Foundation Assets™** and **Deep Application Assets™**.

The Stewardship Unlock

The only tier granted clearance to engage with **Contribution Assets™** and **Holding Circle Assets™**.

Precision Control

Introduces advanced **Controlled Assignment Rights™** specifically for **Precision Intervention Assets™**.
